Module 6

Editing with Claude

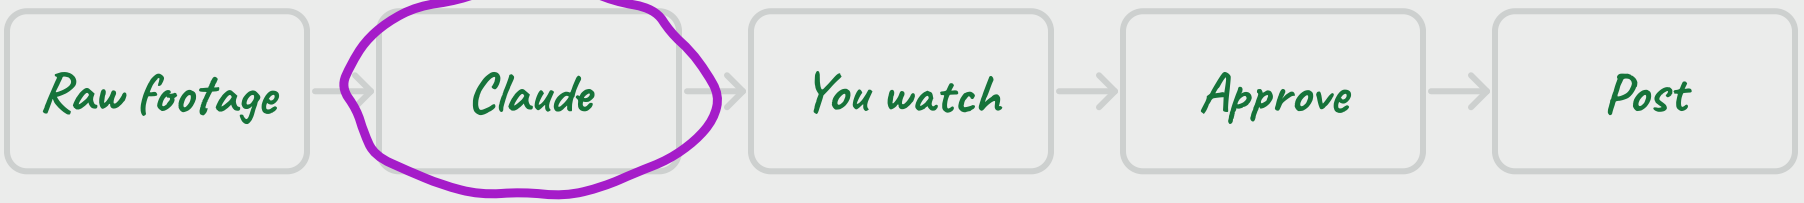

The Old Way vs The Claude Way

OLD WAY

= 2 weeks

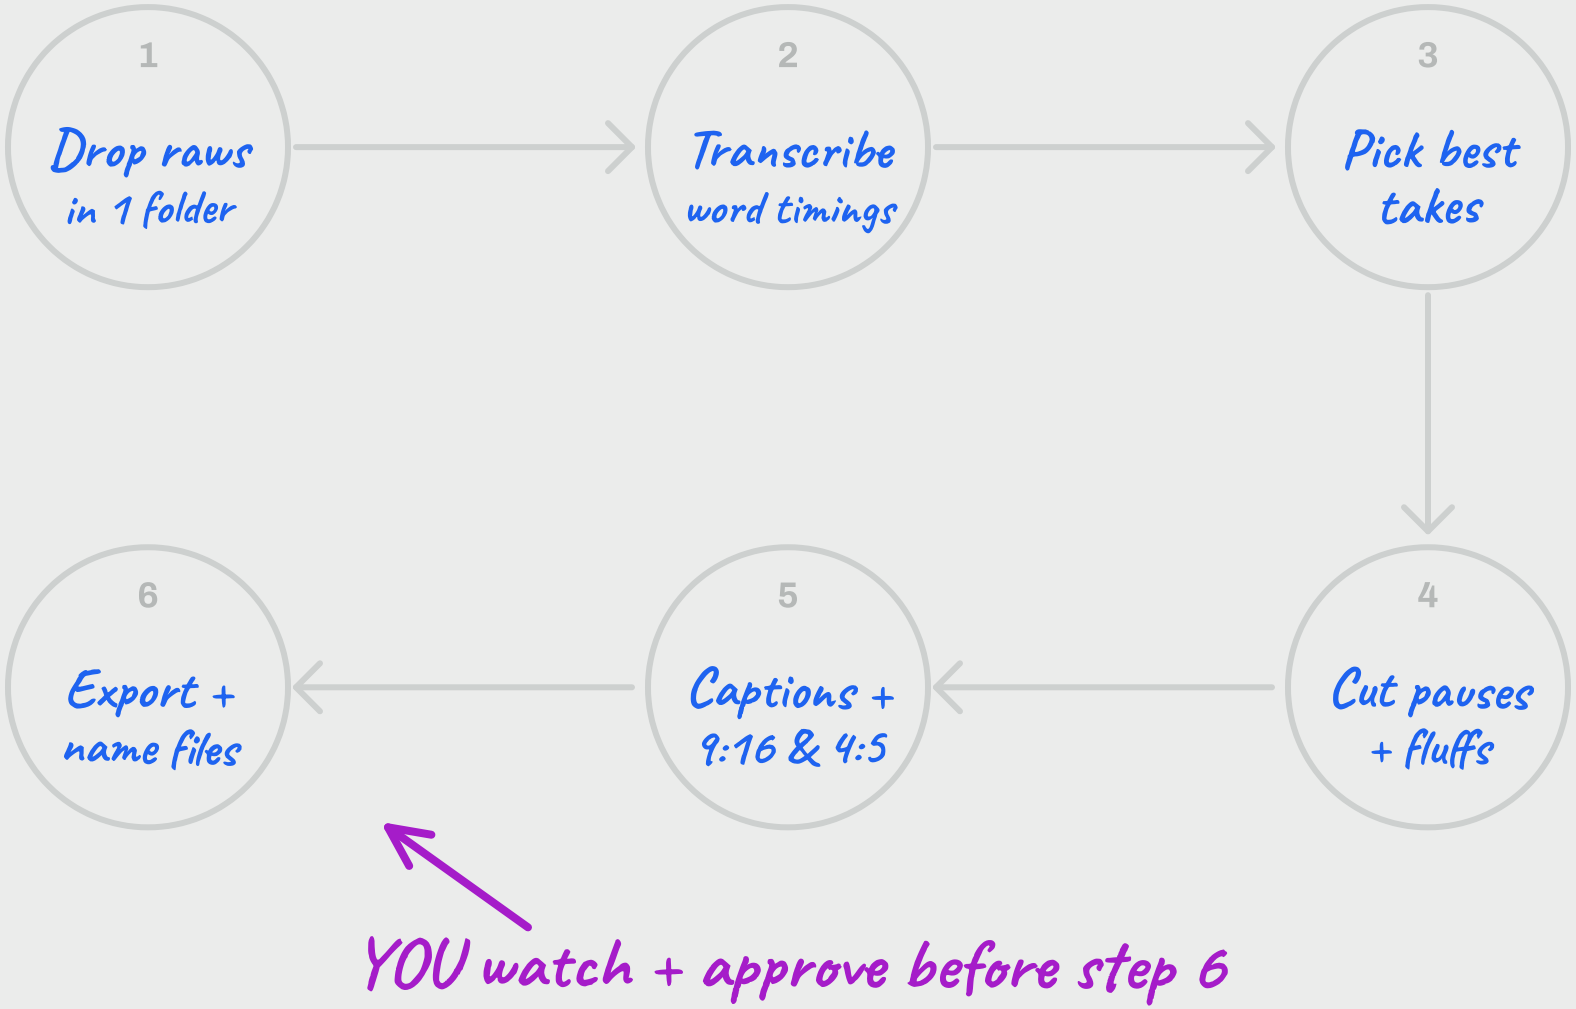

CLAUDE WAY

= same day

magnify growth

The Claude Edit Pipeline

What You Need

1. Claude Pro or Max

Use Claude Code (the Code tab in the Claude desktop app). It can work with the files on your computer, which the chat window can't.

2. One folder per shoot

e.g. Content / 2026-11 Shoot / raw
Copy every clip off the card into it. Add your shot list and scripts.

3. Free tools (Claude installs them)

ffmpeg: cuts, resizes and exports video.
Whisper: transcribes speech with word timings.
Just ask Claude to set them up.

4. Your edit spec

Caption style, brand colours, names and terms to spell right, sizes, end card. One page. (Worksheet at the end of this module.)

Optional: animated captions

Ask Claude to build a Remotion project for word-by-word highlighted captions. Reuse it every month.

Optional: final polish

Open Claude's cut in CapCut or Premiere for music and B-roll, or hand it to an editor as a head start.

Notes

The Prompts

1. Selects

```
My raw clips are in [folder]. My shot list and scripts are in shot-list.md.

Install ffmpeg and Whisper if they're not set up. Transcribe every clip with word-level timestamps.

For each video on the shot list, find the best complete take (clean delivery, no restarts) and give me a cut list: file, in time, out time, and why you picked it.
```

2. Rough cut

```
Cut each video from the cut list.

Remove pauses longer than 0.4s and any restarted lines. Keep a short beat before the key line.

Export 9:16 (1080x1920) and 4:5 (1080x1350). Pull 3 still frames from each so I can check the framing.
```

3. Captions + files

```
Burn in captions using edit-spec.md: bold, 2-4 words at a time, current word highlighted in [colour].

Spell these right: [names, suburbs, legal terms]. Australian spelling ("enquiries").

Name files [Firm]-[##]-[Topic]-[9x16].mp4 and put them in /final.
```

save these, reuse every month

magnify growth

CLAUDE DOES

- Transcribes every clip
- Finds the best takes
- Cuts pauses + fluffs
- Captions + spelling
- Resizes 9:16 + 4:5
- Names + files everything
- Writes 3 alt hooks

YOU DO

- Pick the hook
- Watch every video once
- Compliance check:
- general info only
- no promised outcomes
- no client details
- Approve

Claude does the 80% that's boring.
You keep the 20% that's taste.

magnify growth

Your Edit Spec

Caption style | Font, size, highlight colour, words per line

Bold white, 3 words, word highlighted in our gold

Brand | Colours, logo, end card

Navy + gold. Logo end card "Book a call, link in bio"

Spell these right | Names, firm name, suburbs, legal / finance terms

Smith Lawyers · Parramatta · "enquiries" · de facto · BFA (binding financial agreement)

Sizes | Which platforms?

9:16 + 4:5

Music | Vibe, or none

None on talking heads

Pace | How tight are the cuts?

Tight, jump cuts are fine

Never | Things Claude or an editor must never do

No stock footage · no emojis · no "guaranteed" · never show client documents
